

MECCA BINGO

JANUARY 2022

We were appointed to undertake the large-scale clearance of asbestos containing materials from the ceiling and roof void areas within a live, occupied Bingo Hall.

All works were undertaken under Fully Controlled Conditions and included the provision of Licensed Fixed Access Scaffolding systems to support the Enclosure pattern.

Critical to the success of the project was the zero impact aim on trade. At no point during the works was routine trade affected and all works were completed without incident.

VALUE: £375,000

PROGRAMME: 16 WEEKS
