

ALLIANCE PAPER & TISSUE

VALUE

£340,000

PROGRAMME

8 Weeks

Following a significant fire, we were commissioned to undertake the controlled remediation of damaged asbestos sprayed insulation followed by a full site clearance to this former paper processing plant.

With close liaison with emergency services, the regulatory authorities, the client and surrounding stakeholders, we were able to safely secure the site and undertake a safe, systematic & phased approach to ensure all waste was sorted, screened and processed prior to commencing and completing demolition and site clearance works.
