

MANCHESTER UNITED FC

The background of the entire page is a photograph of a football pitch. In the foreground, several Manchester United players in their iconic red and white striped kits are visible. One player is on the left, another is in the center, and a third is on the right. They appear to be in motion, possibly during a training session or a match. The grass is green, and the overall lighting is bright, suggesting a sunny day.

LOCATION

Various locations
across Manchester

VALUE

£1,000 - £10,000 Annually

WHAT WE DID

Ad hoc asbestos
refurbishment surveys to
coincide with planned
refurbishment to stadiums,
training venues and other
MUFC sites.

CHALLENGES

Working across the large,
varied property portfolio of
one of the world's largest
sporting brands.

We have been providing ongoing ad hoc asbestos surveys and abatement works to Manchester United FC's various locations since 2010. In this time, we have carried out surveying and management works on some of the most iconic locations associated with the club – including the Trafford Training Centre and Old Trafford itself.

The services we have provided over the years have included management surveys to various buildings and venues, targeted refurbishment surveys paving the way for future renovations, as well as bulk sample testing and analysis at specific sites.

In addition, we have provided several separate programmes of planned and controlled abatement projects across the MUFC property portfolio.

We are proud to support such an iconic sporting institution, and believe that our professionalism, efficiency and care with regards to confidentiality have been key in maintaining our solid relationship with the club – long may it continue!
